April 18, 2022

Dear Valued Woodford Customer:

Woodford Manufacturing Company will be increasing prices effective Monday May 9, 2022. This price adjustment is necessary due to a wide range of costs going up, but especially raw material costs.

Wall Faucets +6%

Wall Hydrants +7%

Yard Hydrants +9%

Model 101s +9%

B24/B26 +12%

Roof Hydrants +12%

Sanitary Roof Hydrants +7%

All Roof Hydrant Mounting Systems +12%

Replacement Parts, Repair Kits, Vacuum Breakers +4%

These are average increases per category and some prices will vary slightly.

Full Freight will be allowed on orders of \$3500.00 or more list, effective May 9, 2022.

"Since raw material costs are rising so quickly, we will be restricting orders to a maximum of four weeks supply at the current net pricing based on your previous 12 months of orders. We continue to be committed to shipping normal orders at the new pricing on a timely basis."

The Model 32 Sprinkler Supply has been shipped with a 1" Brass Outlet and a ¾" Brass Outlet when only one or the other is used, most commonly ¾". Effective May 9, 2022, the standard unit will include a ¾" Brass Outlet only. The current unit with the 1" and ¾" Brass Outlet will continue to be offered at a higher price.

Complete Price Lists and Prices in Excel format will be available online at www.woodfordmfg.com in the next week or so.

We appreciate your business and support and will continue to work to ship product consistently. If you have any questions or need additional information, please contact Woodford customer service at 800-621-6032.

Sincerely,

R. Scott Simms
