DEFINED BY CRAFT, DISTINCT BY DESIGN

SOLID BRASS CONSTRUCTION

Newport Brass's commitment to solid brass is unwavering. Chosen not only for its durability, precision in machining, and ability to receive finish with depth and nuance, but because it lives beautifully in the home — gaining character, reflecting light, and enduring with grace.

IN-HOUSE CRAFTSMANSHIP

In-house craftsmanship in California keeps design, engineering, machining, hand-finishing, and quality in one place, allowing for unmatched consistency, accountability, and care at every step of the process.

COMPLETE KITCHEN & BATH SUITES

Complete kitchen and bath suites are offered, from lavatory faucets and matching accessories to kitchen pull-downs and air gaps. This isn't about adding more pieces, it's about designing cohesive systems. Every element is considered together, ensuring proportion, finish, and detail remain consistent across the entire space, so a room feels composed, intentional, and truly complete.

FINISH FREEDOM

Finish freedom is born from the commitment to solid brass and in-house craftsmanship. Because every Newport Brass piece is made from the same solid brass, finishes behave consistently across collections, categories, and the full designed space. It gives designers the confidence to carry a singular vision throughout, knowing that color, character, and quality remain cohesive, intentional, and enduring.

TIMELESS FORMS

Timeless defines both Newport Brass products and the brand. Newport Brass believes that the most enduring design is shaped by restraint, proportion, and material honesty; creating pieces that transcend trend, build legacy, and honor the traditions of craft and making.
