Helps prevent
buildup on the
bottom of the baffle

*See reverse side for full disclaimer.

LEDDefense accessory is compatible with all InSinkErator® continuous feed disposals (Sold separately).

Kills 99% of Odor-causing Bacteria*

InSinkErator® LEDDefense Technology Kills 99% of odor-causing bacteria* combating the smell that comes from bacteria forming as a result of food waste in your sink.

UV-Free LED Light

InSinkErator® LEDDefense utilizes Vyy's LED technology that has isolated a portion of the visible light spectrum (400-420 nm) that kills 99% of odor-causing bacteria.* As it is UV-Free, it is tested for unrestricted, continuous use.

Always on LED Light

Backed by Vyy LED technology, the InSinkErator® LEDDefense flange features an always on, pleasant, purplish-blue LED light.

Helps Prevent Baffle Build-up

LEDDefense technology helps prevent the build up on the baffle by killing germs including bacteria and inhibiting mold growth.*

*Grind Chamber / Flange Below Baffle: Results may vary depending on the amount of light that is reaching the surfaces in the space where the product is installed and the length of time of exposure. Use of Vyy antimicrobial light is not intended to replace manual cleaning and disinfection practices. Sanitization will only function when unit is plugged in and LED lights are on. Testing on a non-enveloped virus (MS2 bacteriophage) showed a 99.985% reduction in controlled laboratory testing in 6 hours on hard surfaces. Testing on SARS-CoV-2 (enveloped virus) showed a 98.45% reduction in controlled laboratory testing in 4 hours on hard surfaces. Testing on Staphylococcus aureus, Salmonella enterica and Escherichia coli showed 99%+ reduction in controlled laboratory testing in 24 hours on hard surfaces. Growth of mold (Aspergillus) inhibited (in laboratory-controlled studies with prolonged use).
